DIGBY WELLS ENVIRONMENTAL SURFACE WATER CONSULTANT (HYDROLOGIST)

Digby Wells Environmental, a service provider to the resources industry, is looking for a candidate for the above position in our Bryanston office.

The successful candidate will be required to provide advice in terms of water quality and quantity monitoring, analysis and hydrological assessment.

Job Objectives:

- Provide the hydrological input into EIA/EMP/IWWMP and IWULA
- Conduct water quantity/quality monitoring as part of baseline assessment
- Conduct flood line modelling and hydrological assessments
- Use of HEC_RAS and other hydrology software
- Develop Water and salt balances
- Ensure that the quality of results meets company's internal standards;
- Assist in the preparation of water permit applications and other regulatory documents;
- Conduct field work including site reconnaissance, water quality sampling, etc.;
- Report writing.

Requirements

- Time and budget management
- Project management implementation
- Communication (written and oral)
- Self-motivated and creative
- Understanding of the National Water Act and DWS guidelines
- Must be in possession of a driver's licence.
- Must be willing to travel throughout Africa and elsewhere, as the need arises.

Qualifications: BSc/ BES degree (MSc preferred) in Hydrology.

Work experience:

- 3-5 years' experience in Hydrology and 1-2 years' experience in consulting.
- Project management experience would be an advantage.
- ArcGIS software and hydrological engineering knowledge would be an advantage.
- Experience and knowledge of mining sector would be helpful.
